

Vaasan yliopisto
UNIVERSITY OF VAASA

ENERGY WEEK

the research
exhibition
of energy

2020

17.3.2020
16:00–18:00

VAASA CITY HALL
Art Hall / Taidehalli

Michaela Hissa, doctoral student
Ignition Studies of Liquid Marine Fuels

Maciej Mikulski, associate professor, internal combustion engines and
Aneesh Vasudev, researcher
Transforming Noise and Vibration challenges in Energy systems

Kendall Rutledge, project leader and
Petri Välisuo, assistant professor
Short-Term Finnish Geo-specific Wind Energy Forecasts

Helena Rusanen, researcher and
Hannu Makkonen, professor
Playbook for successful energy ecosystem management

Mona Enell-Nilsson, assistant professor and
Romy Narayan, researcher
OpenInnoTrain – Industry 4.0, CleanTech, FoodTech, FinTech

Anupam Dutta, assistant professor
Do Green Investments React to Oil Price Shocks? Implications for Sustainable Development

Karita Luokkanen-Rabetino, project leader, VEBIC
Circular Economy Ecosystem for Waste-to-Energy Sector (CEE4WES)
Biogas Utilization Opportunities in Ostrobothnia Region

Annu Perälä, researcher, Innolab and
Tommi Lehtonen, professor
Making Sense of Climate Change: Perspectives of Citizens, Business Leaders and Political Decision-Makers

Klaus Grobys, assistant professor and
Niranjana Sapkota, researcher
Does the energy consumption of cryptocurrencies' consensus protocols affect the pricing of cryptocurrencies?

Khuram Shahzad, researcher and
Sorin Dan, researcher, InnoLab
Talent retention: Our common challenge. How academia and companies join forces to tackle talent shortage

Shah Rukh Shakeel, researcher
Commercialization of Renewable Energy Technologies

Kannan Selvan, researcher, **Kendall Rutledge**, project leader and **Heidi Kuusniemi**, prof and Director, Digital Economy
Space-based Services for Distributed Energy Networks (Smart-Grids)

Jari-Pekka Kankaanpää, Design Engineer, ABB Oy and **Heidi Kuusniemi**, prof and Director, Digital Economy
GNSS Related Threats to Power Grid Applications

Rayko Toshev, researcher and lecturer and
Vaiva Stanisauskaite, doctoral student
Advanced Manufacturing Solutions for Future Electric Mobility

Doctoral student group from
Imperial College London
#research
 Clean energy applications, Future energy system transformations, Application of Machine learning, Sustainable Fuel, fuel cells, Sustainable urban planning and water management, Sodium all-solid-state Batteries, Coastal ocean Modelling, electrical vehicles

EnergyWeek

2020 MARCH 16 - 19
VAASA, FINLAND

Organisers:

University of Vaasa research platforms

Mari K. Niemi
Director
InnoLab
innolab@univaasa.fi

Suvi Karirinne
Director
VEBIC research platform
info@vebic.fi

Heidi Kuusniemi
Director
Digital Economy
digitaleconomy@univaasa.fi
