

Energy storage seminar: How to speed up Nordic battery value chain investments

Wednesday 13 March | 09:00 - 11:15
Music Hall | Free of Charge

Session 1: New energy challenges – batteries (BESS) response for volatile market

EU targets to move towards renewable energy production has been one of the main drivers for rapid changes in energy markets. In Scandinavia change has happened in a very short time and all of us are already familiar with volatile market prices. Wind power capacity in Finland increased rapidly to 7000 MW which is making fossil based powerplants uncompetitive. What role batteries could have on different energy markets when price peaks are more and more common phenomena ?

Session 2: Partnerships – waiting or taking the active role.

Climate change is driving the boom of electric cars. Batteries are in key role and currently there are dozens of new Gigafactory initiatives in Europe. The need is estimated to expand rapidly, but the industry is new and is facing challenges. Best way to move forward, do we wait or take an active role?

Energy storage seminar: How to speed up Nordic battery value chain investments

Moderator

[Marko Kuokkanen](#)

Marketing and Sales Director, GigaVaasa

KEYNOTE: New energy challenges – batteries (BESS)
response for volatile market

Petri Parviainen

Connection to main grid unit manager, FINGRID plc.

Industry response: Representatives from Hitachi Energy and Equinor will participate in the panel discussion

Petri Kärki

Vice President, Sales Europe, Hitachi Energy, Grid Automation

Ola Scheire

Senior Investment Manager, Equinor

KEYNOTE: Partnerships – waiting or taking the active role

[Frank Bråthen](#)

CEO of Siemens Digital Industries Norway

Industry response: Representatives from Epsilon Advanced Materials, Freyr Battery and ABB will participate in the panel discussion

[Heli Rasimus](#)

Project Manager, Epsilon Advanced Materials

[Staffan Södergård](#)

Business Unit Manager, Battery Manufacturing,
Process Industries, ABB

[Tor Stendahl](#)

Managing Director and Country Manager, Freyr
Battery Finland
