

# EnergySampo Forum II

Wednesday 13 March | 13:00 - 16:00  
Art Hall | Invite only

## EnergySampo Forum Vol. 2

EnergySampo invites key industry stakeholders to develop Hydrogen Economy in Finland and West Coast. The EnergySampo Forum Vol. 2 continues the discussion started in the first [EnergySampo](#) Forum (17<sup>th</sup> of October 2023). Its objective is to bring together private and public sector actions to accelerate innovation and investment in the rapidly evolving hydrogen economy.

The Finnish West Coast has an important role in the evolving Finnish and global hydrogen economy. With plenty of renewable energy already today, strong players focusing on ramping up the hydrogen production and number of innovative industry players to use hydrogen in its various

forms, the Finnish West Coast ecosystem has a lot of potential to become a leading innovator in the developing hydrogen economy. Furthermore, the BotH<sub>2</sub>nia collaboration is paving the way for further development.

The event is focused on aligning stakeholder interests to meet the Hydrogen Valley EU Funding Application DL 17.04.

The EnergySampo Forum is an invite-only event. Please contact us to receive your spot.

*About EnergySampo: The founding partners [ABB](#), [Danfoss](#), [Hitachi Energy](#), [Wärtsilä](#), [Vaasan Sähkö](#), [VEO](#) and [VNT Management](#), formed the innovation ecosystem in 2020 to create sustainable systemic energy solutions for carbon neutral future. The partner companies believe that by working together they can find better solutions and to accelerate green transition in Finland and globally. Please find further information about EnergySampo at [www.energysampo.com](http://www.energysampo.com)*

*About BotH<sub>2</sub>nia: The BotH<sub>2</sub>nia association is a cooperation network of local hydrogen valleys in the northern Baltic Sea. BotH<sub>2</sub>nia Hydrogen Valley is an EU project, currently in the application phase, to build a single transnational and trans-provincial hydrogen valley in the northern parts of the Baltic Sea region. BotH<sub>2</sub>nia association and the BotH<sub>2</sub>nia Hydrogen Valley project work closely together but are separate organisations.*
