

Green Hydrogen Value Chain and Cross-Cutting Issues

Tuesday 18 March | 12:30 - 14:00
Meeting Hall

Join us to explore the exciting opportunities and challenges in Finland's green hydrogen sector. Our keynote speakers will discuss national initiatives, business development, and the latest advancements in hydrogen production and market exploration. They will also cover efficient storage, transportation, distribution systems and essential regulations.

A panel discussion with industry leaders, business facilitators, and key hydrogen players will provide valuable insights on the topic. This event is a fantastic opportunity to network and learn about the future of the green hydrogen business in Finland.

This seminar is organized by H2 Excellence, Finnish Center of Excellence (COVE) administered by Vaasa University of Applied Sciences VAMK, Vamia and Merinova.

Green Hydrogen Value Chain and Cross-Cutting Issues
